

FALL 2017 Audiology Clinic Newsletter

This fall we have a new group of wonderful students starting their clinical training!

Front row: Rachel Robinson, Kelly Miller, Alyssa Frennette, Danielle King
Back row: Alyson Schapira, Taylor Bakal, Alanna Schloss

We are pleased to send you this **first edition** of our Clinic newsletter. This newsletter, sent twice a year, will serve as a means of communication with you, our patients, for important updates in the Clinic as well as innovations in management of hearing loss and/or tinnitus (“ringing in the ears”). See below for current product updates and upcoming patient seminars!

This November, **Dr. Sarah Sohns** will be joining the rest of our clinical faculty (see below) in our practice. We are very excited to have her and hope you will join us in welcoming her to the Clinic the next time you are here.

New Hearing Aid Technology – Rechargeable Hearing Aids

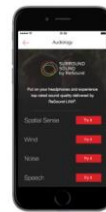

A recent Hearing Aid Tracker survey revealed that 70% of hearing aid users would like the option of using a rechargeable hearing aid battery. Oticon Opn mini RITE hearing aids and Phonak Audeo B-R RITE and Bolero B-PR BTE hearing aids are now available with a rechargeable battery option.

Technology Update – Telepractice for Audiology

Have you ever wished that your audiologist could adjustment your hearing aids without having to make a trip into the office?

ReSound has launched their new *LiNX 3D* product line with 3D sound quality and remote hearing aid adjustment availability called *ReSound Assist*. By downloading their app, the hearing aid user has direct access to an audiologist for hearing aid adjustments from the comfort of their own home!

Upcoming Patient Education Seminars hosted by the Clinic

- Oticon Hearing Aid Seminar – Wednesday, September 27, 2017, 1:00-3:00 p.m.
- ReSound Hearing Aid Seminar – Wednesday, October 11, 2017, 9:30-11:30 a.m.
- Cochlear Implant candidate and recipient Seminar – Thursday, October 12, 2017, 6-8 p.m.

To attend these events or to obtain additional information about new hearing aid technology, call (301) 405-4218.
