The Hearing and Speech Clinic is located on the ground floor of LeFrak Hall, Room 0110, at the University of Maryland’s College Park campus. Directions/parking permits are sent at the time appointments are scheduled. Directions can also be obtained from the clinic website, hespclinic.umd.edu. A wheelchair is available for non-ambulatory patients.

The University of Maryland Hearing and Speech Clinic is a training and community service facility, therefore, services are provided at reasonable rates.

Thank you for helping my son at a dark time — you gave him his one ray of hope, and the first-ever help with his speech.

Cathy, parent
The University of Maryland Hearing and Speech Clinic at College Park has provided speech, language, and hearing services to the community since 1946. The clinic is operated by the Department of Hearing and Speech Sciences as both a training and research facility for Audiology and Speech-Language Pathology.

Services are provided by graduate student clinicians and supervised by clinical faculty members who are licensed and certified speech-language pathologists and audiologists. At Maryland, top clinicians and top researchers work together, providing you with the very best evidence-based therapy and diagnostics.

**SPEECH-LANGUAGE EVALUATIONS & THERAPY**

Evaluations are tailored to individual needs and include extensive written report. Types of communication problems addressed by the clinic include:

- Aphasia/apraxia due to stroke or other neurological impairment
- Delayed speech-language development (individual therapy and LEAP preschool classroom)
- Voice disorders/transgender voice modification
- Post-concussion/TBI
- Language-learning disabilities and social language impairment
- Stuttering and other fluency disorders

**HEARING EVALUATIONS & INTERVENTION**

State of the art technology allows for evaluations of hearing acuity and treatment for individuals of any age.

- Comprehensive hearing evaluations
- Hearing aid selection, fitting, and follow up
- Tinnitus assessment and management
- Cochlear implant candidacy evaluations and programming
- Central auditory processing evaluations

**AURAL REHABILITATION**

Collaborative services are provided for hearing-impaired individuals including:

- Maximizing efficient use of hearing aids and assistive technology
- Therapeutic intervention for cochlear implant recipients
- Communication strategy training for patients and families
